

# ATF EXCHANGER

## For Servicing Automatic-Transmission Systems

The ATF Exchanger Allows The Technician to Perform a Complete Transmission Flush And Fluid Exchange. State-of-The-Art Features Make This ATF Exchanger The Fastest And Most Versatile Machine on The Market.

- Complete Adapter Kit For Domestic/Foreign Vehicles.
  - All adapters come with dripless couplers.
  - Includes adapter application- and identification chart.
- One-to-One Fluid Transfer.
  - Flow-Control System allows for fast servicing (approximately 8 minutes) even on “low-flow” vehicles.
  - Automatic one-to-one system prevents underfills and overfills.
- One-Touch Interface Panel.
  - No valves or adjustments during services.
  - Automatic fluid-recirculation loop at the end of the service.
  - One-touch drain button for a drop-the-pan service (filter replacement).
  - One-touch new-fluid top-off.
- Computer Controlled System.
  - Automatically monitors progress of the service.
  - A self-diagnostic system will report trouble-codes if a malfunction is detected.
  - Records the number of services completed.
- One Machine For Any Type of ATF.
  - Removable color-coded tanks.
- Rugged Plastic Molded Chassis.
  - No rusting, dents or paint chipping.
  - Self-contained new- and used-fluid tanks.
  - Compact and Portable.
  - Built-in storage compartments for adapters and manuals.

**FOR THE COMPLETE AUTOMATIC-TRANSMISSION SYSTEM SERVICE**

## The ATF Exchanger Has Many Features That Make The Technician's Job More Effective, Trouble-Free And Profitable.

**The Service:** Once the machine is attached to the transmission-cooler lines through the supplied adapters, the process is as simple as pressing one button. The machine identifies fluid-flow direction. Old fluid is automatically removed at the same rate new fluid is added, thanks to the fluid-control system. This system allows the fastest fluid-exchange in the industry today, even on low-pressure systems, such as Toyota and Ford. When the service is complete, fluid is automatically recirculated to the vehicle to prevent damage. If a final-fluid level adjustment is desired, the push of a button will drain or top-off the system. To add even more convenience and cost-effectiveness, the ATF Exchanger features interchangeable color-coded tanks. This eliminates the inconvenience and expense of using multiple machines for different types of ATF. The technician can simply remove the "New-Fluid" tank for one type of ATF and attach a different tank.

### Specifications

Dimensions:	40" H x 24" W x 22" D
Weight (dry):	90 lbs. (40.823 kg)
Chassis:	Linear low-density polyethylene
Power:	12 VDC
Tank (new & used fluid):	Capacity - 24 quarts per tank
Hoses:	10 Ft. high temp. with shut-off couplers
Limited Warranty:	1 year, parts and labor
